

# UPGRADE TO SD-TOUCH 9.0

Insert the USB drive into the USB port on the oven until the panel shows **IMPORT/EXPORT**.

Select **IMPORT**.

The software copied from the USB drive will now be showed on the touch screen.

Highlight the software, select **INSTALL** and confirm with **YES**.

Wait for the panel to show **PLEASE REMOVE USB** then press **OK**. Remove the USB drive.

The software is now installed, all settings and parameters remain.

To verify the version of software look in the right hand lower corner when you select **SERVICE MENU** from the start up page.
